ANNUAL REPORT OF THE MEDICAL OFFICER OF HEALTH1967To the Chairman and Members of the Belford Rural District Council.

The report for the year 1967 includes the period covered by my predecessor who left to take up a position in general practice and subsequently by myself when I took up my appointment on 1st July. The initial period has been one of getting to know first people and places and secondly detail. This latter is inevitably a slow and continuing process particularly in an extensive area with a scattered population.

The report is presented in its accustomed form and contains information on the vital statistics for the District and also on the sanitary circumstances which are included in the report of the Public Health Inspector.

VITAL STATISTICS

These show no marked variation from the normal pattern. There were 60 live births which was a slight increase on the previous year's figure of 54. The crude birth rate was 12.4 live births per thousand population and the adjusted rate was 15.0, the area comparability factor for births being 1.21. These rates compare with ones of 17.2 for England and Wales in 1967, and of 11.2 and 13.6 respectively in the District in 1966. Although the rates were higher than in the previous year they were still considerably below the national figure.

Total deaths numbered 58 compared with 64 in 1966. The crude death rate was 12.0 per thousand and the adjusted rate 9.7 per thousand, the area comparability factor for deaths being 0.81. These rates compare with ones of 13.3 and 10.7 respectively in 1966, and of 11.2 in England and Wales in 1967. Causes of death showed no abnormal distribution, the predominant factors being heart and vascular disease and malignant conditions. There were two infant deaths as opposed to one in 1966 and

this resulted in an infant mortality rate of 33 per thousand live births and compares with a national rate of 18.3 per thousand. The causes of death were acute encephalitis and inhalation of vomit associated with pyloric stenosis. There were no maternal deaths.

INFECTIOUS DISEASES

There were no cases of tuberculosis. Notified infectious diseases were 29 cases of measles which occurred in the early part of the year and constituted the tail-end of the normal biennial epidemic.

IMMUNISATION

The statistics for the area are shown in a modified table - by disease instead of by form of injection. The number of immunisations carried out in young children have been related to the number of births in the area during 1967. The percentages shown are therefore only a reasonable index of the acceptance rates but can be considered to be very satisfactory.

SANITARY CIRCUMSTANCES

Mr. Pickering gives the details of these in his report and they call for little comment. Housing disrepair is not a problem in the District. However, he has highlighted two matters of concern - the lack of progress with sewage disposal improvements at Bamburgh, and of obtaining permanent camping facilities at Beadnell. In the latter case indiscriminate camping on an increasing scale with no sanitary facilities would give rise to a considerable public health nuisance with its attendant public health hazards.

Ian G.P. Fraser

Medical Officer of Health

GENERAL STATISTICS

The area of the district was 39,797 acres.

The number of inhabited houses was 2,147 and the number of new houses completed during the year was 9

The rateable value was £166,096 and the sum represented by a penny rate was £ 654

The estimated mid-year population was 4,820 and this figure was taken when calculating the birth and death rate.

WATER SUPPLIES

The Newcastle and Gateshead Water Company continues to maintain all the public supplies to the area satisfactorily so far as quantity is concerned.

The delay in extending a new 6" main feed to Beadnell from the Elford main which is halted at Annstead has continued throughout the year. The delay is due to the road widening scheme being held up over difficulties in land acquisition. I understand that the negotiations for the purchase of the land are now proceeding. It is hoped that this work will begin at an early date to improve the supply to Beadnell.

The proposal to extend the trunk main from Warenford to Belford began to take shape during the year. A scheme has been produced and approved by the Ministry of Housing and Local Government and the Northumberland County Council. At the end of the year the Company were preparing the necessary tender documents. I hope therefore that the extension of this water main to Belford will bring about an improvement in the quantity and quality of water supplied to the village in the early future.

Tabulated below is a statement of samples taken and results obtained of the public water supplies:-

Source	Total Samples taken	Excellent	Satisfactory	Unsatisfactory	No. of unsatisfactory samples with faecal coli
Belford Village	14	10		4	3

Total	60	54		6	5

SEWERAGE

The comminutor provided for the sea outfall at Beadnell is working satisfactorily. Since its provision there have been no complaints of pollution of the foreshore.

It is with regret that I have to report that no real progress has been made on the provision of the Disintegrator Station at Bamburgh. An Engineering Inquiry was held during the early part of the year and the Inspector visited the sites. Arising from his investigation the Council were asked to have float tests taken to ensure that no effluent from the outfall would subsequently pollute the foreshore. Float tests were arranged and the results are now with the Ministry. At this stage it is not possible to say when the works will commence but I would hope it may be at an early date in order that the present unsatisfactory arrangements may be discontinued.

The Belford works continue to operate satisfactorily and the effluent has, throughout the year, complied with the terms of the permission issued by the Northumbrian River Authority.

The St. Aidans outfall at Seahouses gave some trouble during the year due to silting up. The works of unstopping were prolonged and the stoppage appeared to be of long standing. This outfall is now operating satisfactorily. The remaining outfalls have operated without any complaint during the year.

PUBLIC CLEANSING

The collection of house refuse continued satisfactorily during the year and apart from peak periods, little overtime was necessary. The new arrangements for collecting trade refuse have resulted in a more efficient service and have also reduced the amount of loose paper being taken to the tips. The collection of litter has been one fraught with complaints. Vandalism and public apathy have resulted in large quantities of litter being deposited throughout the coastal area. Litter bins have been stolen and burned giving some indication of the state of mind of some members of the public abusing the amenities of this pleasant district. I welcome the Council's decision to introduce a "paper sack"

system of litter collection which may result in some improvement in the standard of litter collection.

Tipping at Embleton has resulted in some increase in time taken to carry out collections. The mileage covered by the refuse collection vehicles has increased from 18,300 in 1966 to 25,800 in 1967. The mileage increase would have been even greater had the Council not had on order a new larger vehicle. This vehicle carries approximately $2\frac{1}{2}$ times as much refuse as the vehicle it replaced and the extra running costs incurred by increased fuel consumption are more than offset by the reduction in the number of trips to the tip.

The volume of refuse as opposed to weight is undoubtedly increasing and it would seem to me that in the not too distant future the Council may have to purchase a vehicle of even greater capacity to cope with the ever increasing volume of refuse.

Both the tips are controlled and reasonably well maintained. Only one complaint was received during the year of the condition of the tip at Chatton Moor, this was after a particularly stormy weekend. Immediate remedial action was taken and no further complaint has been made. The tip at Tynely is now well maintained and is serving a very useful purpose.

The tractor has operated with the minimum of trouble throughout the year taking into account the work it has to do and its age.

I would like to take this opportunity to pay tribute to the work done by the cleansing staff who have done so much to give the highest possible standard of service.

In order that the service can cope with expansion due to house-building and the increasing tourist trade it may be that consideration will have to be given to the use of a paper-sack system of refuse collection. This may be effected either by the use of bin-liners or purpose-made sack holders. This would be in accordance with the recommendations of the Working Party on Refuse Collection set up by the Minister of Housing and Local Government.

I welcome the greater powers given to Local Authorities in regard to the removal of abandoned vehicles by the Civic Amenities Act, 1967. The practice of dumping vehicles in this district is not widespread and I hope that those members of the public in the district who have vehicles which they wish to dispose of will contact me to arrange for their destruction at one of the Council's tips.

PUBLIC CONVENIENCES

The conveniences continued to be well used by members of the public. I am pleased to report that there was virtually no damage due to vandalism during the year.

In the period under review progress was made on the proposal to build new conveniences in the Car Park at Seahouses. The need for this facility is pressing and I am pleased to be able to report that the scheme is now with a firm of architects who will provide working drawings and bills of quantities etc. I hope that work will commence on the erection of the building during the early part of the next financial year.

CAMPING AND CARAVANS

All sites have continued to be well maintained. The Council's Camping Site at Beadnell recorded the highest number of visitors during its history. The site has only temporary planning permission expiring at the end of the coming season and the Council have not yet been successful in finding a suitable site to replace it although every effort has been made. The sites investigated have all been abandoned either as a result of a planning objection or because the owner of the land would not be prepared to sell or lease it to the Council. The problem of finding a suitable site is one which would now appear to be insoluble. The urgency can not be denied and unless suitable provision is made, then a reversion to the state of affairs obtaining before the existence of the Council's site will occur with all the attendant nuisances caused by the lack of sanitary facilities.

There are 16 licensed holiday caravan sites within the district which are permitted to have a total of 1,117 caravans stationed thereon.

On inspections very few contraventions of the licence conditions were found, these were all dealt with informally.

There is one other licensed camping site in the district which operated satisfactorily through the year.

FOOD INSPECTION

The following food was voluntarily surrendered and condemned for the reason shown:-

Commodity	Reason for Condemnation	Weight
Canned Meat	Tainted	33 lbs.

OFFICES, SHOPS AND RAILWAY PREMISES ACT, 1963

Most registered premises were inspected during the year and most complied with the requirements of the Act and Regulations made thereunder.

Any contraventions were dealt with at the time of inspection and immediately remedied.

Below is a statement of visits made to premises to which the Act applies.

Class of Premise	No. Registered during year	Total Registered at year end	No. of Premises receiving general inspection during year
Offices	1	12	6
Retail Shops	-	37	27
Wholesale Shops	-	-	-
Catering Estab.	-	32	32
Fuel Storage Depots	-	-	-

Total no. of visits	-	102

Total of Females	" " " " " " " "	280
No. of premises for which exemption was sought during the year	-	-
" " " " " " " granted	" " " "	-

There were no prosecutions for offences under the Act.

One accident was reported during the year in which no serious injury resulted therefore no further action was necessary.

FOOD HYGIENE (GENERAL) REGULATIONS, 1960

All food shops and catering establishments have been regularly inspected and I am pleased to report the maintenance of a high standard of hygiene generally. Minor infringements have occurred but all were dealt with on the spot and the remedial action taken.

Below is a tabulation of types of premises and the application of Regulations 16 and 19 to them.

Type of Premise	Number of Premises	Number complying with Reg. 16	Number to which Reg. 19 applies.	Number complying with Reg. 19

-	-

PROPERTIES OTHER THAN SEWERS

1. Number of properties in district.
2. (a) Total number of properties (including nearby premises) inspected following notification.
- (b) Number infested by (i) Rats
- (ii) Mice
3. (a) Total number of properties inspected for rats and/or mice for reasons other than notification.
- (b) Number infested by (i) Rats
- (ii) Mice

SEWERS

4. The sewers were tested for rat infestation and at Seahouses and Bamburgh complete 'takes' were recorded. On subsequent re-examination however, no further 'takes' were noted. It would seem to me that perhaps the bait had been removed from the benching by flood water in the first instance as no associated ground infestations were noted.

FACTORIES ACT, 1937 to 1961Part 1 of the Act
